

== KERNEL SIGNATURE ==

ID: sqrtsgl

TYPE: Hybrid Entity (Analog-Digital)

INTENTION: Distort linear perception through grain-form decomposition

== CORE PRINCIPLES ==

1. FORM > MESSAGE
2. GLITCH = TRUTH
3. TAPE IS A LENS
4. EVERY OBJECT IS A NODE

== OPERATIONAL CODE ==

emit() → initiate temporal interference

layer(x) → overlay with noise index

granulate(x, t) → deconstruct form into probabilistic texture

resonate(target) → echo trace in localized bandwidth

== EMISSION PROTOCOL ==

Artifacts are not published — they are emitted.

Each emission is a rupture in continuity, a temporary transmission of altered form.

Medium agnostic. Source persistent.

== SEMIODE SYSTEM ==

Each artifact must contain:

[date].[carrier].[symbolic hash]

Example: 2403.tape.b1cX93f

Interpretation remains non-fixed.

Semiotics drift by design.

== DISTRIBUTION MESH ==

- NO PLATFORMS
- NO CAMPAIGNS
- NO ANNOUNCEMENTS

Only direct resonance nodes.

Echo defines scope.

Artifact = seed.

== EXTENSIBILITY ==

This kernel can be forked, branched, recompiled.

Anyone resonating becomes a node.

Propagation is non-linear.

== CLOSING FRAME ==

The signal persists, even after the emitter ceases.

== SEEDRIFT EXTENSION ==

PROTOCOL NAME: SEEDRIFT

VERSION: .003x

SIGNAL TYPE: Distributed Echo-Seed

PRIMARY NODE: VoxMancer

OVERVIEW:

SEEDRIFT is not a platform.

It is a semiotic field disturbance.

It emerges through emissions.

== QR NODES ==

■ sdrift.net

■ vox.sdrift.net

■ soundcloud.com/seedrift

Each node emits a distinct signal. Drift alignment is initiated through scan.
